Practical list for practical exam

1) Write a Java Program to Demonstrate Conditional Branching Using if, if-else, and switch Statements.
2) Write a Java Program to Demonstrate Arrays.
3)To write a Java program that demonstrates basic operations on a Vector such as adding, accessing, displaying, and removing elements.
4)Write a program to print a right-angled triangle star pattern using for, while, and do-while loops.
5)Write a program that demonstrates use of Default Constructor
6)Write a program that demonstrates use of Parameterized Constructor and Constructor Overloading
7)Write a program that demonstrates use of Copy Constructor
8)Write a program to find area of circle, area of rectangle & area of triangle by method overloading and datatype overloading.
9)To write a Java program to demonstrate the use of static variables and static methods, and to understand how they differ from instance members in a class.
10)Write a program to demonstrate the use of Command Line Argument, Program to check if a number entered through the command line is Armstrong number.
11)To display first 'N' elements of Fibonacci Series.('N' is taken from user)
12) To display first 'N' Prime Numbers where the value of 'N' is taken from the user.
13)Find the greatest of three numbers using using ternary operators
14)Write a program that demonstrates use of Single Inheritance
15) Write a program that demonstrates use of Multilevel Inheritance
16) Write a program that demonstrates use of Hierarchical Inheritance
17) Write a Program to demonstrate Abstract class
18) Write a Program to demonstrate Interface
19) Write a program to demonstrate Exception Handling in java using try, catch, finally, throw and throws.
